

Intelligent Spend Management

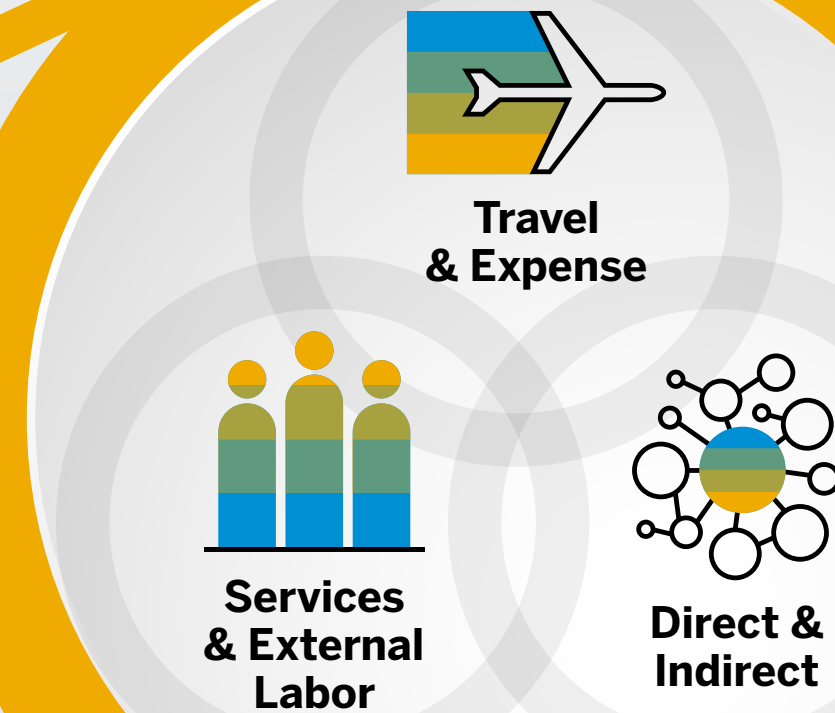

Every source. Every category. One unified view.

When your total vendor spending comes together – direct, indirect, T&E, services and external labor – finance and procurement leaders get control of *each* spend category and the power to orchestrate spending and processes *across* categories.

Comprehensive Policy and Supplier Management

Capture spending from inside and outside traditional channels, centralizing once-invisible spend, applying policies consistently and bringing more spend under management.

Best-in-Class Control of Each Category

Put decades of experience, learning and innovation within each category to work, while connecting to unmatched supplier networks and ecosystems of third-party solution providers.

Unified View of Spending

Bring spending data together from across categories, delivering full transparency into costs for projects, products or business units, plus the insights and recommendations on the next best action to take.
