Health Business Intelligence

Gain real-time insights into structured and unstructured healthcare information and use predictions to make informed decisions.

- ✓ **Healthcare Predictive Analytics**
Create high-performance predictive modeling by automating or choosing algorithms including your own.
- ✓ **Augmented Analysis**
Capitalize on automatic insights augmented by advanced machine learning and predictive analysis.
- ✓ **Dashboard Design**
Design impactful data visualizations and BI dashboards to communicate analytics insight.
- ✓ **Enterprise Data Warehouse**
Build your data warehouse quickly with an integrated data warehouse application.
- ✓ **Application Design**
Quickly create and deploy analytics apps to give users the insight they need anytime, anywhere.
- ✓ **Centralized Analytics Access**
Simplify access to analytics scattered across multiple environments by centralizing it.
- ✓ **Data Discovery**
Discover and answer complex business questions with access to data from all sources in one location.

SAP Analytics Cloud

Discover previously unseen insights with machine learning, simplify access to critical information with natural language processing, and model complex scenarios with powerful predictive capabilities.

SAP BusinessObjects Enterprise

Increase visibility and agility across your digital supply chain by leveraging machine learning for logistics, manufacturing, and asset management.

Health Data Integration

Unlock maximum value from all of your healthcare organization's data with exceptional functionality for data integration.

- ✓ **In-Memory Data Integration**
Integrate high-volume data with better performance and scalability.
- ✓ **Federated Data Integration**
Integrate data by avoiding unnecessary data movement and implementing virtualization for higher security.
- ✓ **Data Integration for S/4HANA**
Improve business intelligence, compliance, and continuity to deliver accurate, updated data as needed.
- ✓ **Big Data Integration**
Integrate data using data pipelines to deliver intelligent data for your intelligent enterprise.
- ✓ **Batch Data Integration**
Support data analytics and integrate high volumes of data from legacy systems without additional hardware.

SAP Analytics Cloud

Harness the latest technologies and give everyone in your organization the ability to discover actionable insights in real time with this single solution that delivers business intelligence, planning, and predictive analytics.
